PROFILE

I'm an enthusiastic Computer Science student with a long term goal of having an exciting career in cybersecurity. Since immigrating from England at age 10, I have grown my passion for computers, including volunteering to teach robotics to elementary students. I've always had a passion for computers since I began using them at a young age, even starting to create mods for games by the time I was 11. In high school, I excelled in my studies and received the computer science award in grades 11 and 12, and am now pursuing my interest in my post-secondary studies. I am very motivated to gain experience in a professional IT services setting, where I can expand my knowledge and experience in this field.

EDUCATION

BA of Computing

2019 - Present

University Of Guelph

Majoring in Computer Science using languages such as C, Java, HTML and Javascript to design data structures, databases, games, algorithms, websites and more.
